MANEET

Aspiring Web Developer | BCA Student (Currently Pursuing)

Email: mohanmanish740@gmail.com | GitHub: github.com/maneetunictechnology/maneet-jwell11

PROFESSIONAL SUMMARY

Aspiring Web Developer and Bachelor of Computer Applications (BCA) student with hands-on experience building full-stack web applications, e-commerce workflows, and data-driven solutions. Practical expertise in modern JavaScript, React, Next.js, Node.js, and MongoDB, backed by functional project architectures and continuous problem-solving.

TECHNICAL SKILLS (VERIFIED)

Frontend: HTML5, CSS3, JavaScript (ES6+), React, Next.js (App Router), Tailwind CSS

Backend: Node.js, RESTful API Design, Server Route Handlers, Session Cookies

Database: MongoDB (Document modeling, CRUD operations, atomic stock management)

Tools & Packaging: Git, GitHub, Vercel Deployment, Capacitor (Mobile Packaging)

EDUCATION

Bachelor of Computer Applications (BCA) **[Currently Pursuing]**

Status: In Progress | Coursework: Data Structures, Algorithms, DBMS, Web Development

SELECTED PRACTICAL PROJECTS

MikuMantra E-Commerce Website (Primary Project | Live: https://miku-mantra.vercel.app/)

Next.js, React, MongoDB, Node.js, Tailwind CSS, Razorpay (Mock), Capacitor

* Engineered an end-to-end jewellery & lifestyle e-commerce platform using Next.js App Router and MongoDB.
* Implemented dynamic product catalog with category filtering (Diamond, Gemstone, Enamel), image zoom, and related items.
* Built client shopping cart & wishlist state persistence with secure session cookie authentication and profile management.
* Constructed coupon validation engine (AURELIA10, WELCOME2000), Cash on Delivery (COD) flow, and Razorpay Mock verification.
* Designed automated order number generation (format "AUR-XXXXXXXX-XXX") with transactional inventory decrementing.
* Developed administrative dashboard tracking store metrics (revenue, orders, product count) and full inventory CRUD operations.
* Configured Capacitor integration, compiling the web frontend into native Android APK packages (app-debug.apk and Mikumantra.apk).

AI-Powered CRM [Prototype & Architectural System]

Next.js, React, Node.js, MongoDB, Tailwind CSS

* Designed software architecture and data models for lead ingestion, website research logging, and qualification scoring.
* Configured pipeline progression workflow (New Lead -> Researched -> Qualified -> Proposal) with chronological activity timelines.

Product Distribution Platform [Exploration & Data Modeling]

React, Node.js, MongoDB, JavaScript, CSS

* Explored centralized product information management (PIM) schema unifying product attributes across multi-channel marketplaces.
* Created attribute transformation mapping workflows and syndication feed formatters for structured CSV and JSON exports.
